

ALL IN ONE SELF ETCHING AUTO BODY PRIMER

This primer chemically etches the surface of bare metal to replace the "metal conditioning" step needed for corrosion resistance. Ideal for small rub-throughs. This product can also be used to prime aluminum and galvanized surfaces to prevent top coats from peeling off. This new improved formula works well on plastics, SMC and fiberglass!

- Professional Fan Spray
- Fast Drying
- Excellent Adhesion
- Corrosion Resistant
- For Steel, Aluminum and Plastic Parts
- For Rigid or Flexible Surfaces
- Chemically Etches to Bare Metal
- Sands Easy With Superior Fill

DIRECTIONS

1. Surface must be clean, dry and free of rust before painting. Use IES #1700 or #4700 Super Clean to remove any contaminants from surface.
2. **Shake can for 1 minute after mixing ball moves freely.**
3. Feather edge and sand painted surfaces. Do not use over newly painted surfaces.
4. Apply 2 to 3 medium coats allowing a 3 to 5 minute dry time between each coat. Spray surface with steady, even strokes at a distance of 6 to 8 inches. Longer distances may cause poor hide and poor adhesion. Product will be dry to the touch in 15 minutes. Allow one hour dry time before sanding, priming or top-coating. No need to sand if re-coated within 24 hours.
5. When finished, turn can upside down and spray about 3 seconds to clean out valve and sprayhead.

NOTE: For TPO and Polypropylene substrates, we recommend using #4182 Adhesion Promoter. Sprayhead provides a horizontal or vertical fan spray by turning the nozzle clockwise or counterclockwise.

NOTICE TO PURCHASER: The following warranty is in lieu of all other expressed or implied warranties, specifically all goods are manufactured of first class materials and by competent professionals. We have no control over the use and application of our products. Our liability shall not exceed the purchase price.

STORAGE

Product should be stored in a cool, dry location in unopened containers at a temperature between 50°F to 85°F (10°C to 30°C) unless otherwise labeled. Protect package from direct sunlight and heat. To prevent contamination of unused material, do not return any material to its original container.
